

Why your business/church/organization needs a quality website...

- **Consumers are searching online for the products and services you provide** - are they finding you, or your competitors?
- **Better use of advertising \$\$\$** - direct prospects to your website for more information about your company, products, and services.
- **Improved Customer Service** - provide on-demand information about your company (hours, map, directions, etc.), and your products and services (testimonials, etc.).
- **Websites work 24 hours per day** - never calling in sick or taking a day off, answering questions and helping your visitors get to know you and your business.

Oh, you already have a website?

- **Are you paying too much?** Is your website finished? Are you satisfied with your website?
- Do you have to track down and pay your developer to make updates?
- Can customers find your website when they search for the products/services you offer?

DWS WebHosting may be able to help.

For what many businesses/churches/organizations spend on a few newspaper ads, they could buy a DWS WebHosting website package ***for a year!*** We focus on helping small businesses, churches, and organizations get noticed online with professional, affordable, easy-to-update websites.

Website packages include:

- * Domain - www.yourdomainhere.com
- * Complete website design and build
- * Basic Logo creation
- * Professional Email accounts -you@yourdomainhere.com
- * Search Engine Submission - we submit your website to Google, Yahoo!, and MSN
- * Search Engine Optimization - we take care of the geeky stuff that gets your website found by searchers
- * Traffic reports - access to traffic reports, find out how many visitors there were, how they got there, etc.
- * Video Help System - step-by-step videos
- * **Update as often as you wish—FREE!**
- * **No computer programming required!**
- * No hidden charges

Website features (choose one or all):

- * Photo viewer / slide shows - location, staff, before/after pictures of work completed
- * Interactive Map - zoom, pan, change views
- * Blog - keep visitors up to date
- * Event Calendar
- * Announcements
- * Item of the day - quote, bible verse, or word of the day
- * PayPal Donation buttons - accept donations on your website using PayPal's secure system
- * Custom Data Forms - collect information from website visitors in order to provide quotes, etc.
- * Local Weather - auto updating local weather
